Order Picking

Prepare more orders in less time. Our award-winning order picking solution makes your store workers more efficient than ever by taking full advantage of automated solutions.

SCAN ME

StrongPoint Order Picking is a fast, flexible and low-investment solution for e-commerce fulfilment, delivering up to 5x higher manual picking performance than traditional methods. With rapid onboarding, smart route optimisation and full cloud control, retailers can scale quickly while keeping costs low.

Key Benefits:

Pick-by-Light: Faster, simpler picking using electronic shelf labels, ideal for similar items.

MFC Compatible: Combines automation with manual picking for total fulfilment efficiency.

Optimised Routes: Automatically calculates the most efficient picking paths.

Easily scale your workforce up or down to match demand. With just 10 minutes of training, anyone can be up and running and picking confidently.

SCAN ME

Q-Commerce Lockers

Smart lockers designed for rapid fulfilment in urban areas. Enables fast pick-up of smaller, immediate orders (Q-commerce).

Key Benefits:

- 24/7 click & collect – Convenient, contactless pickup
- Ambient, chilled & frozen – One solution for all product types
- Lower labour costs – No staff needed at collection
- Fast customer pickup – Orders collected in minutes
- Secure & weatherproof – Built for outdoor use
- Scalable & integrated – Grows with demand and links to e-commerce systems

Grocery Lockers

Temperature-controlled click & collect lockers for groceries (ambient, chilled, frozen). Reduce labour costs.

Key Benefits:

- 24/7 customer pickup – Convenient click & collect anytime
- Multi-temperature – Supports ambient, chilled & frozen
- Lower labour costs – No staff required at collection
- Fast handover – Orders collected in under a minute
- Secure & weatherproof – Built for indoor and outdoor use
- Scalable & integrated – Grows with demand and links to e-commerce systems

Vensafe Select & Collect

A secure, compliant solution for selling age-restricted and high-value items such as tobacco and medicines. Customers simply select, pay and collect, with products released only after payment and age verification, making it ideal for both staffed and self-checkout environments.

Key Benefits:

- Reduces shrinkage and theft
- Ensures full age-restricted sales compliance Works seamlessly with self-checkout
- Improves store efficiency and customer flow

SCAN ME

Why Retailers Choose Vensafe- Select & Collect:

Retailers choose Vensafe to minimise shrinkage and theft, enable flexible checkout across staffed and self-checkout lanes, reduce checkout congestion, improve safety and compliance, and unlock new revenue through in-store digital advertising.

Touchscreen kiosks integrated at shelf level maximise space and enhance the shopping experience.

Outdoor Housings & DRS Machines

Our outdoor housing solutions can be tailored to any machine, any size, and any shape. Each unit is fully scalable and custom-built to deliver durable, weather-resistant protection for your assets in outdoor environments.

SCAN ME

Reverse Vending Machines for bottle and can returns that help retailers meet recycling legislation while offering convenient customer refunds and deposit returns. Built for robustness, flexibility, and modern payment integration, they are ideal for environments ranging from offices and hotels to outdoor, high-footfall public spaces.

SCAN ME

SCAN ME

StrongPoint GO

Automated vending/retail unit for unmanned sales. Customers can shop quickly with minimal staff involvement using smart vending technology.

Key Benefits:

- 24/7 retail channel- lets you sell anytime, anywhere for continuous revenue.
- 99 %+ product-recognition- automatically identifies selected items for smooth checkout.
- No app needed- customers shop easily via card or mobile payment.
- Flexible installation- works in multiple environments (stores, offices, gas stations, etc.) and supports ambient, chilled or frozen products.

Automation *(Partnered with AutoStore)*

An advanced automated warehouse and micro-fulfilment solution, designed to optimise space, speed, and efficiency in order processing. Using a grid-based cube storage system, robots seamlessly store and retrieve items with high precision, enabling rapid and reliable fulfilment of online grocery orders. This technology is ideal for both back-of-store micro-fulfilment and larger distribution environments, helping retailers meet growing e-commerce demand while maintaining operational efficiency.

Key Benefits:

- Up to 4× greater storage density, maximising use of available space
- High-speed, automated order fulfilment for faster delivery times
- Improved picking accuracy and operational reliability
- Scalable and flexible system design to support future growth
- Reduced labour dependency and lower overall operating costs

SCAN ME

Self-Checkout

An integrated self-service checkout that reduces queues and labour costs while improving the customer experience, featuring advanced security, intelligent error detection, and seamless POS and payment integration.

Key Benefits:

- Modular & Scalable – Smooth, secure transactions
- Faster Checkouts – Reduced wait times and better flow
- Optimised Workforce – Staff focused on higher-value tasks
- Maximised Space – Greater store efficiency

SCAN ME

Built for speed. Designed for security.

POS

Point-of-Sale platform combining hardware and software for fast, reliable checkout. Integrates with loyalty, promotions, payments, and back-office systems.

Key Benefits:

- Fast, reliable transactions – Keeps queues moving at peak times
- High security & compliance – Protects data and supports age-restricted sales
- Scalable & flexible – Grows easily with your store estate.
- Real-time reporting – Full visibility of sales and performance

SCAN ME

Reliability where it matters most.

Swivel Checkout

An ergonomic checkout solution with swivel functionality, designed to optimise space utilisation, enhance cashier comfort, and improve customer flow at the front end. The swivel design allows the checkout to adapt seamlessly to different store layouts and service needs.

Key Benefits:

- Improved space efficiency – swivels to suit compact or flexible store layouts
- Enhanced cashier ergonomics – reduces strain and supports more comfortable working positions
- Better customer flow – enables smoother movement and faster service at peak times
- Flexible operation – easily adapts between assisted and self-service scenarios
- Modern, adaptable design – integrates seamlessly with existing front-end setups
- Integrated security scales to minimize shrinkage

Designed for Modern Stores:

- Maximise's front-end space without compromising throughput Improve's staff wellbeing and productivity
- Create's a smoother, more efficient checkout experience for customers Future-proof's your store with a flexible, scalable checkout solution

SCAN ME

Shopfitting & Checkout Refurbishment

StrongPoint Shopfitting & Refurbishment delivers end-to-end retail solutions, including full store refurbishments, consolidations, fixture procurement, and M&E installations. With over 20 years' experience, we help retailers adapt to modern demands by improving efficiency, reducing costs, and creating impactful in-store experiences.

Key Benefits:

- Modernised store layouts
- Extended equipment lifespan
- End-to-end project delivery
- Reduced refurbishment costs
- Improved in-store experience

SCAN ME

ESL (*Partnered with Vusion*)

SCAN ME

Electronic Shelf Labels for dynamic pricing and digital shelf communication. Enables real-time updates and supports omnichannel pricing strategies.

Key Benefits:

- Instant price updates across single stores or entire estates
- Reduced labour costs by removing manual price changes
- Improved pricing accuracy & compliance
- Faster picking & restocking when linked to picking systems

Scales (*Partnered with Digi*)

SCAN ME

High-quality retail scales for produce, deli, and fresh counters. Provide weighing, pricing, and labeling with Digi technology.

Key Benefits:

- Accurate weighing & pricing
- Fast in-store packing & labelling
- Flexible use across store areas
- Linerless labels for reduced waste
- Lower operating costs
- Improved customer clarity & experience

Retail Media (*Powered by LiveSpace*)

SCAN ME

An in-store digital signage and retail media platform enabling targeted advertising, dynamic promotions, and enhanced shopper engagement.

Key Benefits:

- Targeted messaging at the right time
- Instant remote content updates
- Reduced print costs and waste

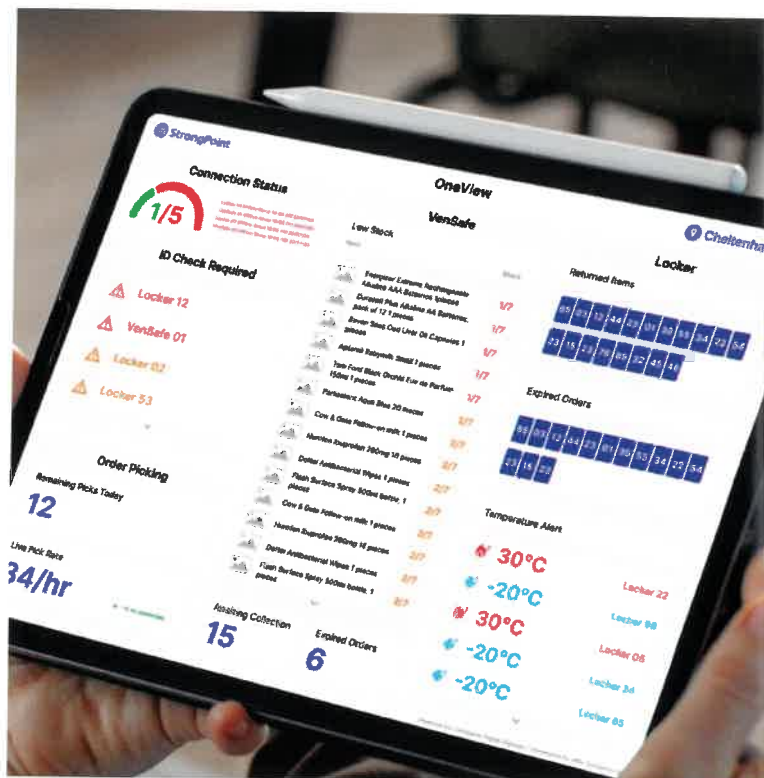

StrongPoint OneView

A centralised monitoring and analytics dashboard that delivers a true “single view” of your entire operation, bringing together store performance, order fulfilment activity, and equipment status in one intuitive interface. This enables faster decision-making, proactive issue resolution, and continuous operational optimisation across your estate.

SCAN ME

StrongPoint Services

Comprehensive professional services covering installation, ongoing support, staff training, and full lifecycle management, ensuring every StrongPoint solution delivers maximum performance from day one and throughout its entire lifespan.

SCAN ME

Partnered with ZEBRA

StrongPoint has partnered with Zebra Technologies to deliver integrated retail solutions, combining its expertise with Zebra's mobile devices, scanning technology, and Workcloud software to improve efficiency, inventory visibility, and in-store performance.

SCAN ME

Partnered with deliveroo

StrongPoint has partnered with Deliveroo to enhance last-mile grocery fulfilment, combining in-store picking and lockers with on-demand delivery. This gives retailers more flexible options like rapid delivery and click & collect, while improving efficiency, accuracy, and scalability.

SCAN ME

Partnered with Vusion

StrongPoint has partnered with VusionGroup to deliver smart in-store retail solutions, combining advanced order picking technologies with electronic shelf labels (ESLs) and real-time data capabilities. Together, they enable faster, more accurate picking, improved price accuracy, and enhanced in-store efficiency, helping retailers optimise operations and deliver a seamless shopping experience.
